Smart Note

Smart Note provides some unique feature which makes it stand out. It allows users to store note with speech to text feature. The app can sense the reminders in the note and can set the reminders automatically with just one click. Users can assign tags to the notes and can search it accordingly. Priority can be set to the notes and sorting of notes is done with the same. Background colour of the notes is changed based on priority. Image can be set to the note, which will be displayed while viewing the notes. With these features we try to make the use of a note app even more convenient for the user.

Installation

1. Download the SmartNote.apk file.
2. Open the SmartNote.apk file, it will display the installation process and ask for certain permissions. If you are willing to grant these permissions, click "Install" button.
3. After the installation is successful, you will get a success message.
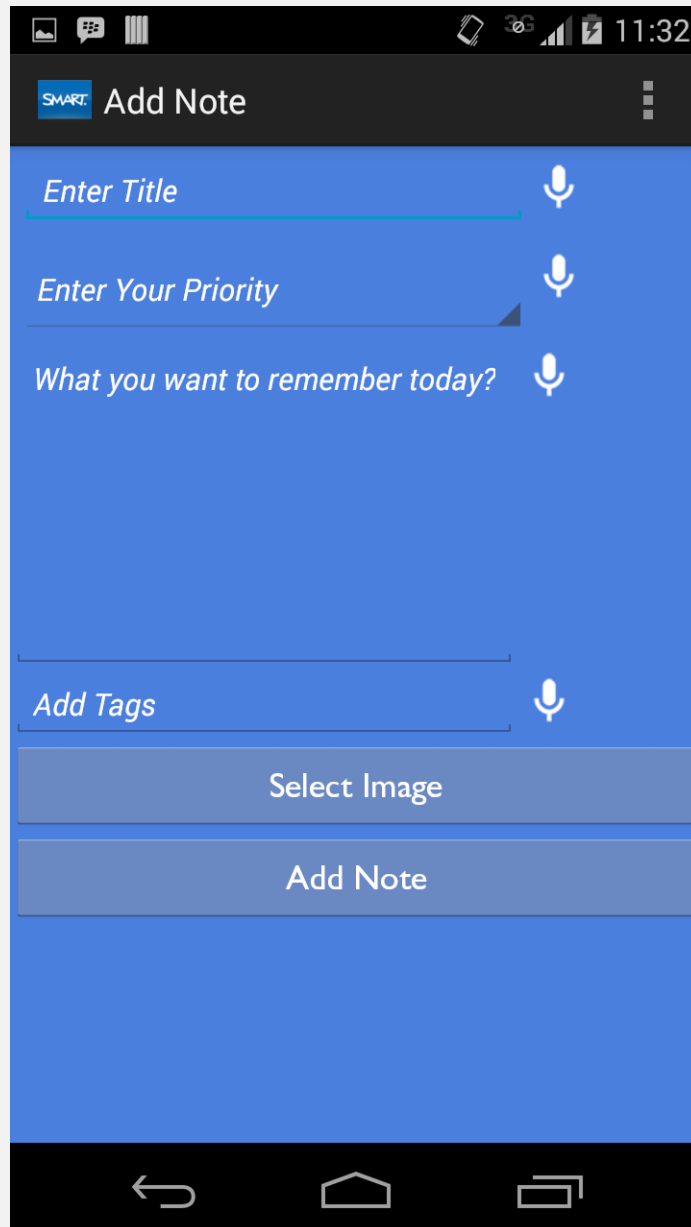

Starting Smart Note

You can click on "Open" to open the **Smart Note** application. You can also open the application later by clicking the Smart Note icon from your menu screen.

Initially there will no notes to display.

Add Note

You can click the **Add New Note** icon on the top right corner to add new note. The **Add Note** window will be displayed.

Add Note with Voice to Text Feature

You can type the details or you can use the voice to text feature by clicking the **mic icon.**

You can set priority: High, Medium or Low. Based on the priority set, the background of the notes while viewing will be changed (Red, Orange or Green) respectively.

Smart Reminder

In the Body section a reminder can be set using @time annotation for setting a reminder for the same day. We can also set the reminder for any other day by using @date annotation.
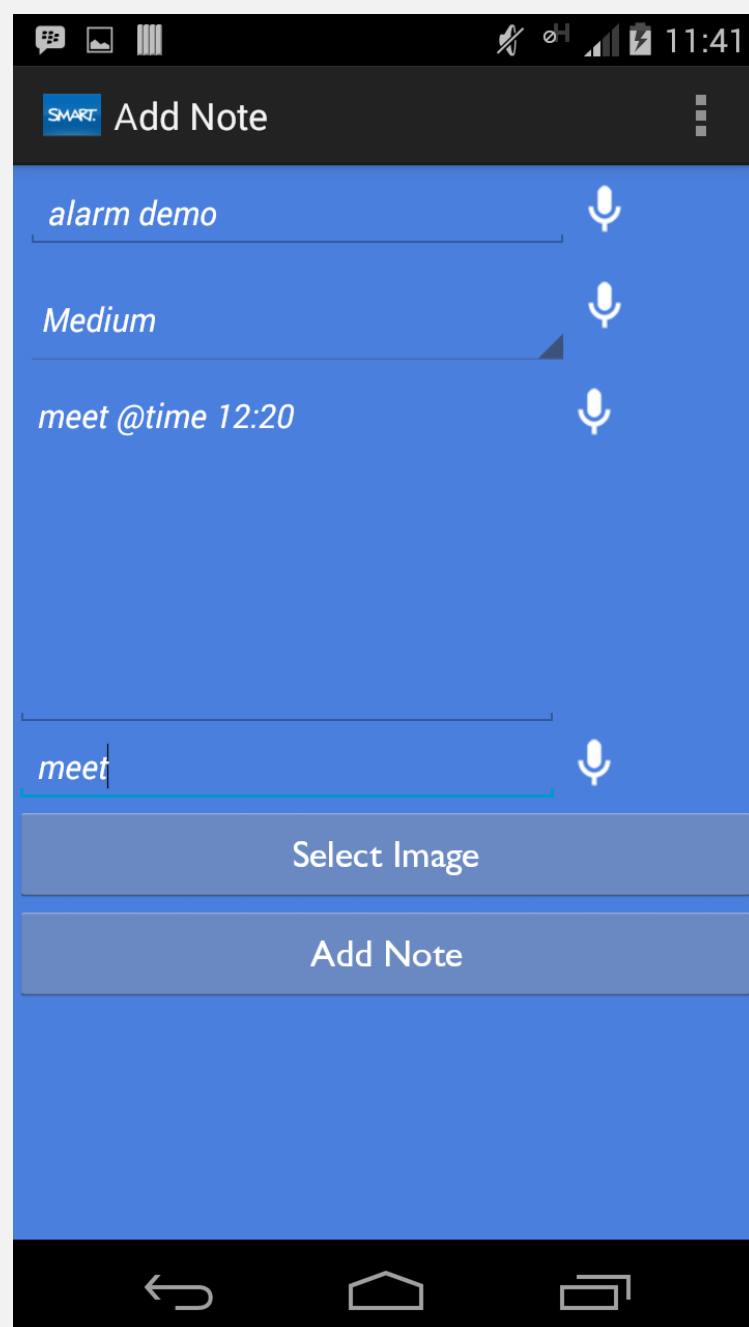

The format for @time is 24 hour clock format without am/pm.

Eg: **To set a reminder for 12:20 for current day:**   @time 12:20

The format for @date is DD-MM-YY format. **/** can also be used as a separator.
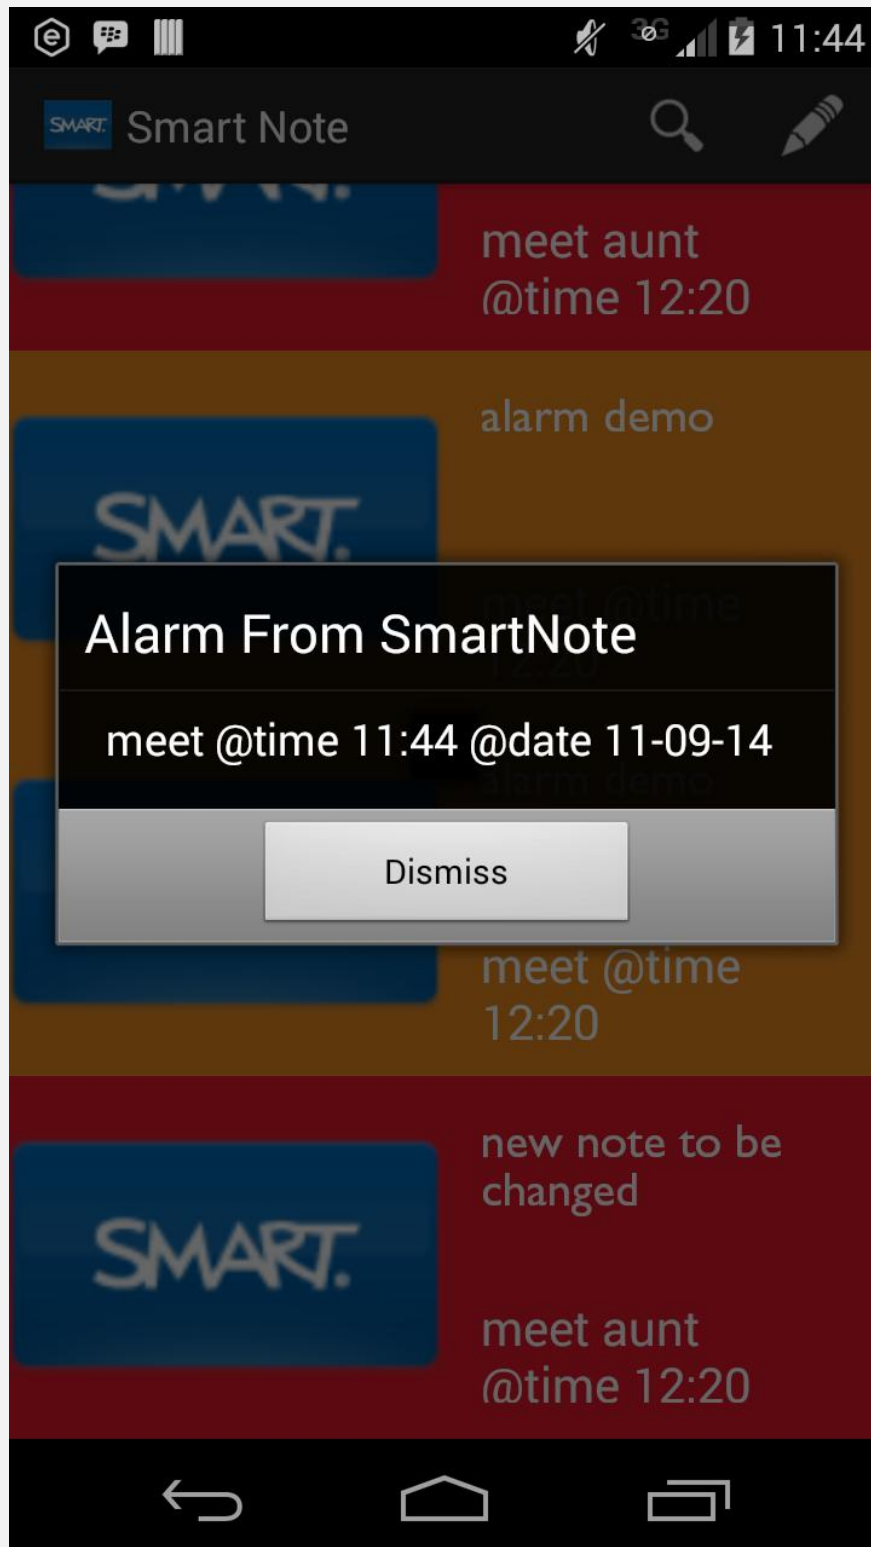

Eg: **To set a reminder for 13:20 on 12th September 2014:** @time 13:20 @date 12-09-14

The position of @date and @time in the note does not matter.

After filling the rest of the details and clicking **Add Note** button a pop will be displayed to confirm reminder.
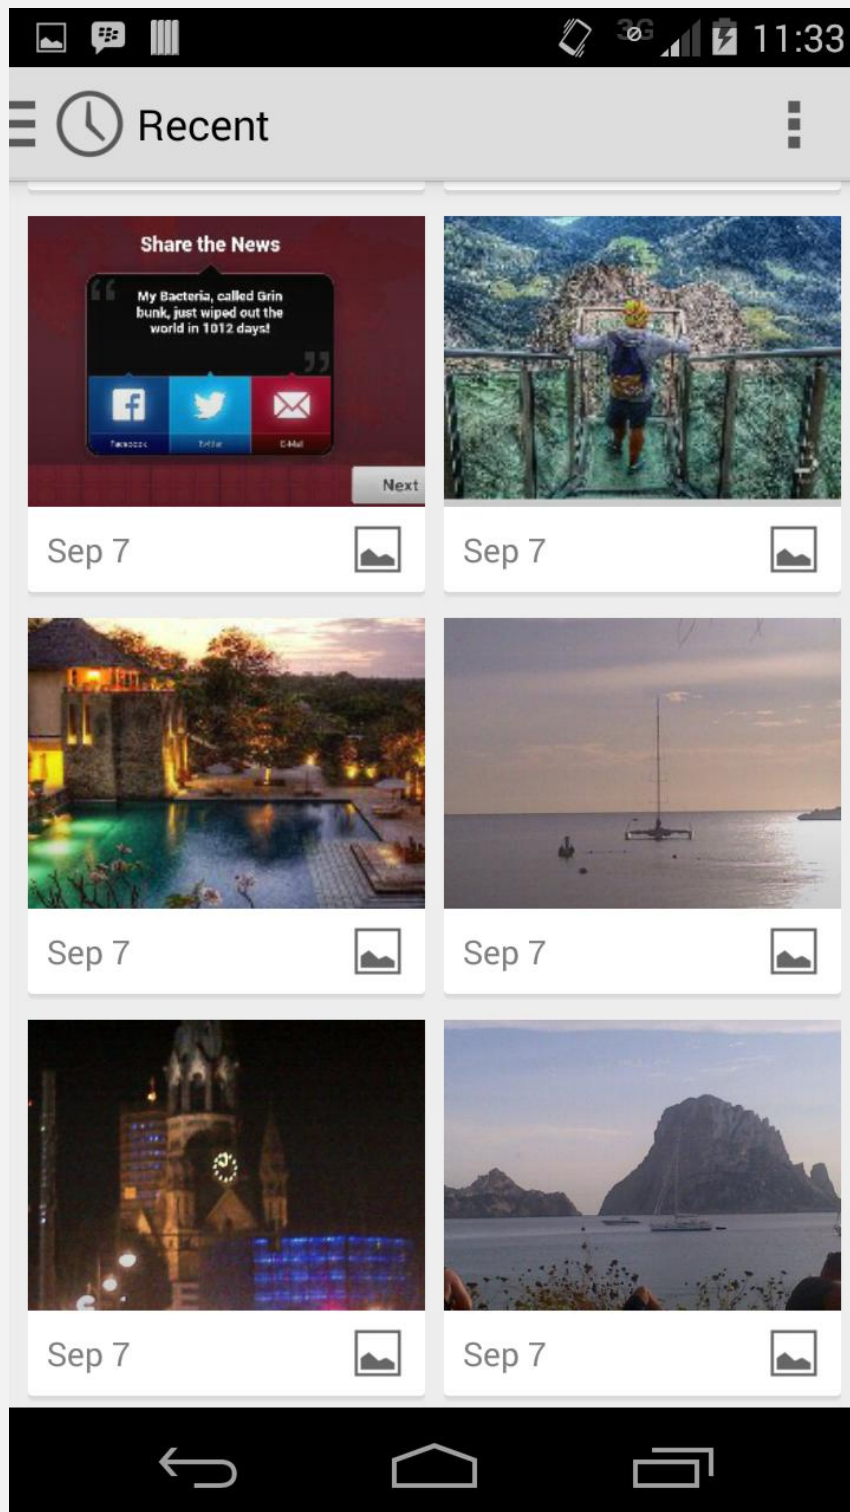

The Reminder will be displayed in the following manner.
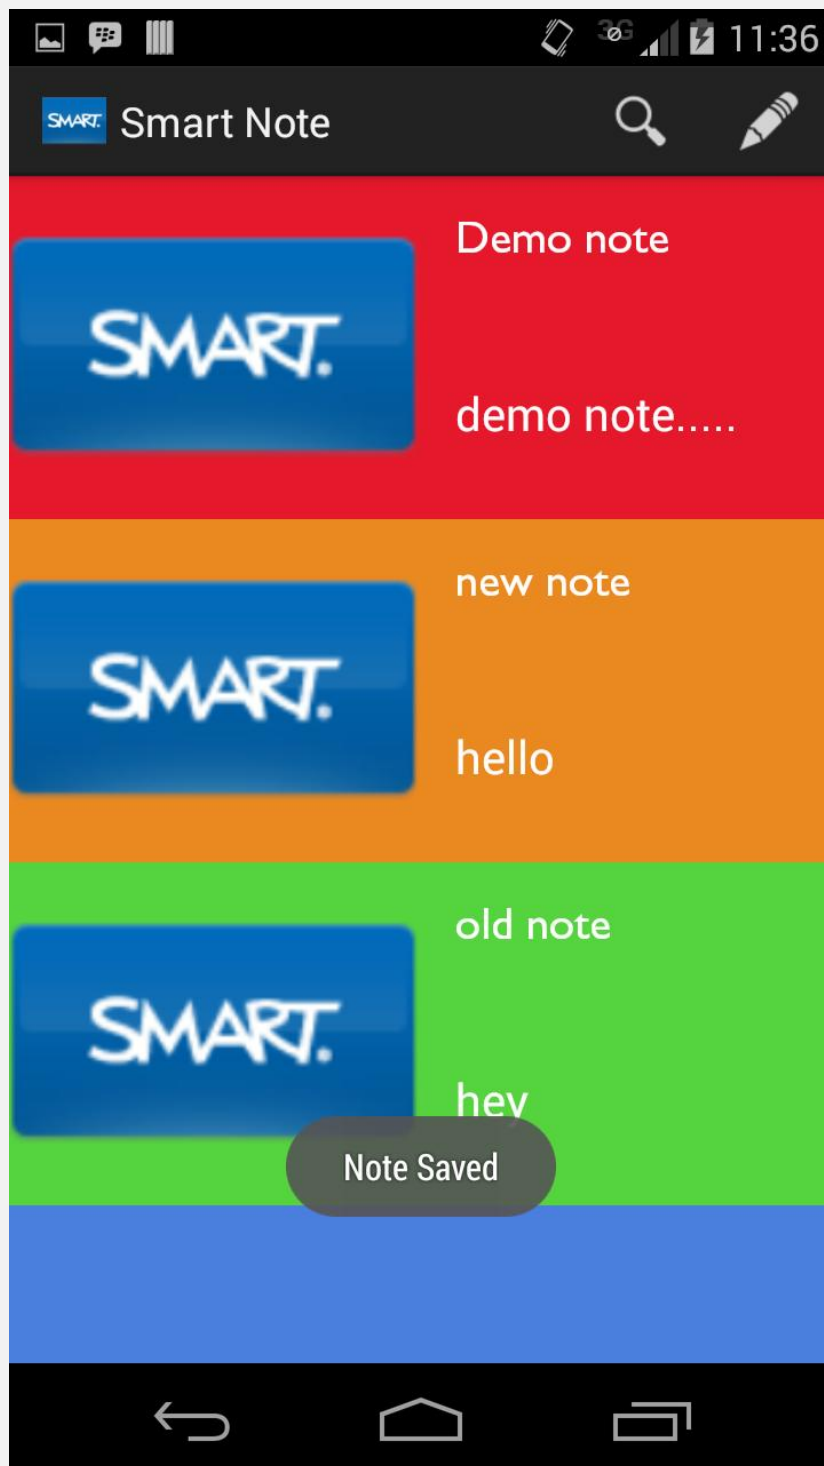

Adding Image to the Note

Images can also be added to the note by clicking the "Add Image" button. Any image from the Image Gallery can be selected.

View Notes

After adding the note, it will be viewed in a list format with an image and background colour according to the priority. Note title and some content of the note will also be displayed.
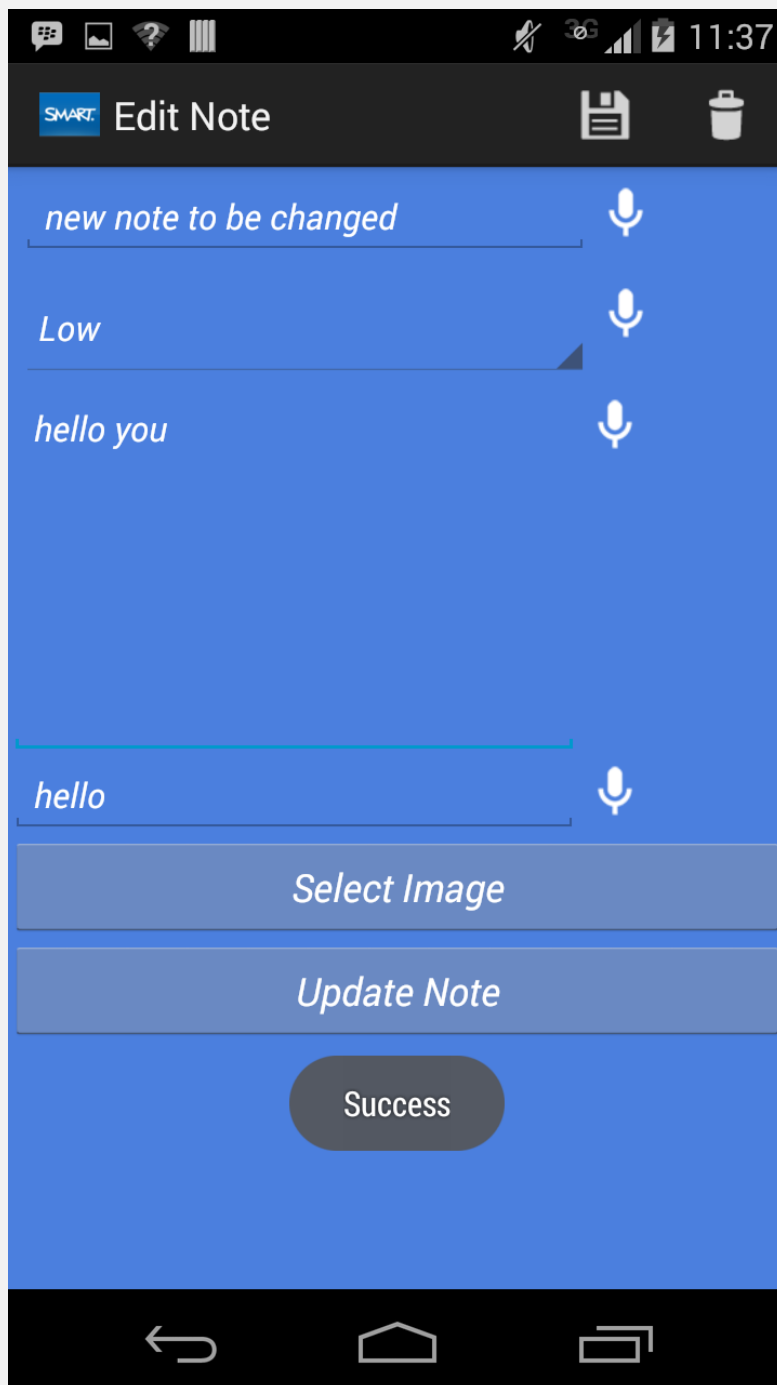

All Notes are sorted based on priority assigned.

Red background for **High Priority.**

Orange background for **Medium Priority**.

**Green** background for **Low Priority**.

Edit Note

Note can be edited by clicking over it. Edit Note window will be displayed.

After Clicking the "Update Note" button the note will be updated and a "Success" message will be displayed.
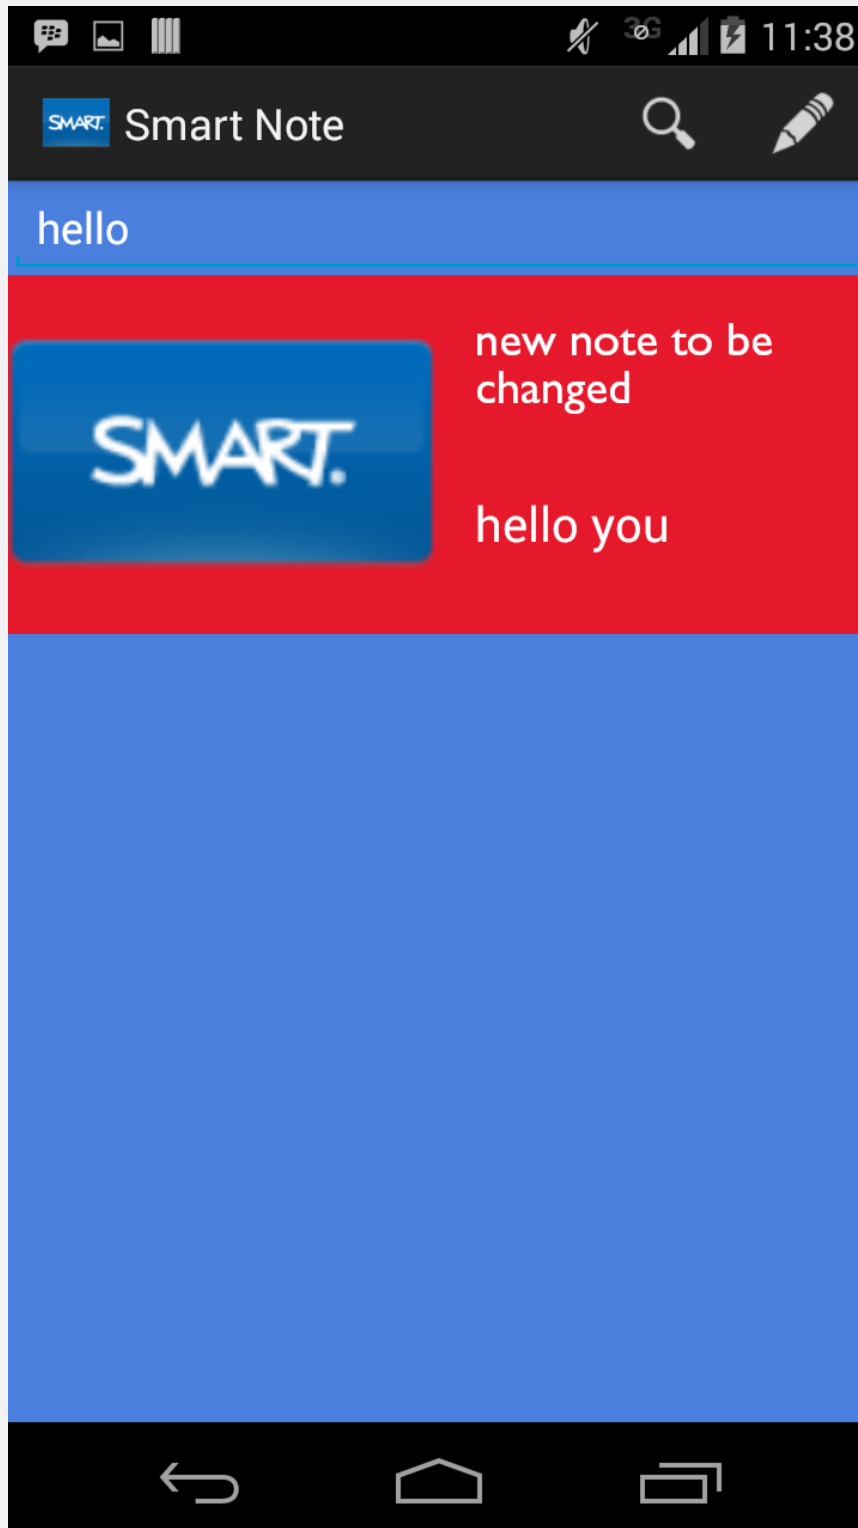

Delete Note

Notes can also be deleted by clicking the "Delete" icon on top right.

A delete confirmation box will pop up.

Search Note by Tags

Notes can be seached by clicking the **Search Icon** at the top. **Only Tags** can be sued to search notes.

Note with "hello" Tag is searched.
